

GENESEE COUNTY REGULATION TO PROHIBIT SMOKING IN ENCLOSED PLACES

SECTION 1000 - TITLE

This Regulation shall be known as the Regulation to Prohibit Smoking in Enclosed Places.

SECTION 1001 - AUTHORITY

This Regulation is adopted pursuant to authority conferred upon local health departments by Section 2441(1) of the Michigan Public Health Code, Act 368, P.A. of 1978 as amended, MCL 333.1101 et seq.

SECTION 1002 - JURISDICTION AND ADMINISTRATION

1002.1 This Regulation shall have effect throughout Genesee County in all areas incorporated and unincorporated, which includes cities, villages and townships.

1002.2 The Health Officer shall have responsibility for administering and enforcing this Regulation, including all amendments hereafter adopted unless otherwise specifically stated.

1002.3 Nothing in this Regulation shall be construed to restrict or abrogate the authority of a municipality in Genesee County to adopt more restrictive regulation or ordinances.

1002.4 This Regulation is intended to be supplemental to the Michigan Clean Indoor Act, MCL 333.12601 et seq. and any other statutes enacted by the State of Michigan to protect the public health. Where the provisions of any other state law, ordinance, rule or regulation apply, the more restrictive of any or all laws, ordinances, regulations or rules shall prevail.

1002.5 Any person subject to this Regulation may be required to submit reports to demonstrate the status of compliance with the Regulation.

SECTION 1003 - FINDINGS AND PURPOSE

1003.1 Genesee County hereby finds and declares that:

- 1003.1.1 The U.S. Surgeon General¹, National Research Council², and National Academy of Sciences, report that environmental tobacco smoke causes lung cancer in healthy adult nonsmokers, and can cause lung function and structure alteration to the fetus of pregnant nonsmoking women. Additionally, in utero exposure is known to predispose children to long-term pulmonary risks. Further, these agencies found, separating smokers and nonsmokers within the same air space may reduce but does not eliminate a nonsmokers exposure to environmental tobacco smoke.
- 1003.1.2 The U.S. Environmental Protection Agency³ (EPA) finds that environmental tobacco smoke is a Group A Carcinogen - a category reserved for known cancer-causing agents in humans.
- 1003.1.3 The National Institute for Occupational Safety and Health⁴ (NIOSH):
- (a) finds that secondhand smoke poses an increased risk of lung cancer and, possibly, heart disease to people exposed in the worksite,
 - (b) recommends that nonsmokers should not be exposed to environmental tobacco smoke (secondhand smoke), and
 - (c) indicates the simple separation of smokers and nonsmokers within the same airspace may reduce, but does not eliminate, the exposure of nonsmokers to environmental tobacco smoke.
- 1003.2 These studies find that tobacco smoke is a major contributor to indoor air pollution, and that breathing secondhand smoke is a cause of disease, including cancer, heart disease and stroke in nonsmokers. At special risk are infants, children, teens, pregnant women, elderly people, nonsmokers with long-term exposure to secondhand smoke, individuals with cardiovascular disease, and individuals with impaired respiratory function, including the young, asthmatics and those with obstructive airway disease. Also harmed are those with health conditions induced by breathing secondhand smoke including asthma, lung cancer, heart disease, respiratory infection, decreased respiratory
