

Tool #1

Question: How do we begin the process of developing and implementing a smoke-free regulation?

Answer: First Responder Assessment

This tool is a 'quick and dirty' assessment that will help to set the stage for major items to consider as your coalition begins strategic planning for a smoke-free air regulation. The more in-depth assessments will follow. Please contact Karen or Orlando to plan a meeting to walk through the assessment with you and your coalition/team members.
