

Tool #4

Question: What resources are available when I have questions regarding racial and ethnic diversity, inclusion, cultural competency, and issues regarding disparate populations? Is there a resource that addresses other non-ethnic/racial disparate populations in Michigan?

**Answer: Michigan Multicultural Network
Strategic Plan for Addressing Michigan Disparities ***

The Multicultural Network is a group representing Michigan's major ethnic minority groups. The Chicano/Latino, African American, Asian American, Arab American and Native American population groups are represented. Each agency participating in the Network has information and expertise regarding tobacco as it affects their population. These agencies are available to provide general resource information about their population in Michigan, and answer questions that you may encounter. See the attached listing for the member agencies of the Multicultural Network. *Contact Sophia Tyler for further information regarding the Strategic Plan for Addressing Michigan Disparities.
