

Tool #7

Question: How do we promote the coalition and its support for a smoke-free regulation?

**Answer: Slide presentation about the Coalition and the SF Issue
Other Presentation Materials**

The attached slide presentation contains the basic components to be covered in explaining who you are and why your coalition supports a smoke-free environments regulation. It can be changed to target the needs of the specific audience or group you are addressing. This is a very useful and flexible tool to have in a regulation tool kit. We've also included a sample tri-fold pamphlet and an information packet that can be sent or presented to local officials to educate them regarding the benefits of smoke-free environments and the legal (local) authority to protect people from secondhand smoke. Finally, see two sample resolution and a petition that groups, organizations, and individuals can sign and send to elected officials in support of a SF regulation.
